**(Manual for Ontario School Boards)**

**Revised April 21 2017**  
Includes up to release No. 7

# **Uniform Code of Accounts and Financial Data Requirements For Ontario School Boards**

## **Introduction**

This document is provided to outline the Ministry of Education’s detailed financial data requirements for Ontario School Boards.

The purpose of this manual is:

- To outline the specific financial data and “mandatory accounts” that are required for reporting to the Ministry of Education;
- To provide definitions for recording of specific types of revenues and expenditures;
- To provide definitions regarding which accounts will be considered classroom and non-classroom; and
- To define administration and governance, pupil accommodation and special education expenditures for enveloping purposes.

Boards are required to report detailed financial data using the “mandatory accounts” provided in this manual. In many instances, school boards may wish to collect and capture information in more detail than the level required by the Ministry. Therefore it is expected that a Board’s actual chart of accounts will vary from the mandatory requirement. Boards are free to expand or change the accounts utilized for its own purposes but must be able to summarize and report the “mandatory accounts”.

## **Structure of the Uniform Code of Accounts**

The Uniform Code of Accounts is structured such that account segments are grouped together to form unique account codes. The groupings of accounts, as set forth in the Manual, reflect the range of services now offered by the districts and school authorities and the level of detail that the Ministry of Education requires from school boards.

The Mandatory Account Segments are as follows:

Function: 2 digit code which reflects the minimal broad revenue and expenditures categories required for reporting revenues and expenditures to the Ministry of Education

Object: 3 digit code reflects the specific accounts within the above broad revenue and expenditure category required for reporting to the Ministry of Education

Panel: 1 digit code which assigns expenditure to a panel, where applicable.

Location: Board Defined

Program: 3 digit code which allows for accumulating specific program costs

(School boards may wish to expand any/or all of the segments for internal reporting).

The order of the account segments has no particular importance or significance and a Board may structure its account number in any order that suits its various reporting purposes, as long as the data can be reported in the prescribed format. However, this document will use the following structure for examples:

XX – XXX – X – XXX – XXX

Function Object Panel Location Program

Location information will be Board specific and will not be reported to the Ministry of Education. The mandatory accounts to be reported will therefore be in the following format:

XX – XXX – X – XXX

Function - Object - Panel - Program

This Manual includes three sections.

Section 1: Code & Description Listing with definitions. This section includes a simple listing of the mandatory codes and related descriptions and definitions for each account segment. The definitions and descriptions will explain the types of expenditures that would be coded to each account segment or combinations of segments. Examples will be included as appropriate to clarify the definitions.

Section 3: Listing of Accounts– sorted by Object Code, Function Code. This section will include a complete listing of all valid combinations of account segments and the mapping reference for inclusion in the various expenditure categories, and indicate how accounts are categorized for enveloping .

The Ministry of Education will provide clarifications for this manual from time to time as the need arises.

## **Relationships: Code of Accounts and the Student Focused Funding Model**

The Code of Accounts defines the smallest building block of data that is necessary to produce financial information for the Ministry of Education.

**It is important to note that although there is a similarity between the Code of Accounts and the expenditure grid used for Ministry reporting purposes, they are not the same. Refer to instructions for the Schedule of Expenditure in the Ministry grant forms.**

Example: A bursary provided by the Board of Trustees would be coded as function “Governance/Trustees” as follows:

31 - 705 - 1 - xxx - 000

Governance/Trustees –Student Bursaries/ Awards Elem - General Program

but would be mapped to “Texts, Classroom Supplies & Equipment” (Classroom envelope) in the Schedule of Expenditure in the ministry reporting forms.

For further information or clarification regarding the Code of Accounts, please contact the Finance Officer assigned to your board, or any of the following:

Andrew Yang (Andrew.yang@ontario.ca)

## Function Definitions

It is important to note that although there is a similarity between the Code of Accounts and the expense grid used for Ministry reporting purposes, they are not the same. Refer to instructions for the Schedule of Expense in the Ministry grant forms.

Please note that the examples that are provided are for illustration purposes. These examples are not all encompassing. There are other possibilities.

Library texts, books and learning materials should be coded to 23-320.

See 320 - applicable to materials not HST Exempt

For **Codes 330 and 551**: With the implementation of capital assets, Object codes 330 and 551 are redundant. As a result, boards are not required to differentiate between these accounts. Boards have the option of choosing the reporting in either 330 or 551. However, if boards wish, they can continue to use both codes.

**330 Instructional Supplies**

Includes other classroom supplies including paper, pens, pencils and other classroom materials. Where this object is combined with functions other than Instruction it may only cover items used directly by or for the students.

Note: Amounts spent from school generated funds should be to complement, not replace, funding provided from the Ministry and should not be used for items that are funded through the allocated budget of a school board including, but not limited to learning materials and textbooks. For more information see 2010:B10 and 2011:B2.

For **Codes 331 and 661**: Where it is difficult to differentiate between the cost of software and the associated license or the cost of the license is nominal, boards can include these amounts in either 331 or 661. Allocating between these object codes is not necessary.

For **Codes 401-403** The use of codes 401-403 is optional. Boards could record expenses directly in codes 551 to 553 or the capital assets code as appropriate. If the asset addition codes are used, boards should review these accounts monthly to reallocate the expenses/TCA's to the appropriate accounts. These accounts should have a zero balance at year end.

Note: Capital projects supported by fundraising proceeds should not result an increase in the student capacity of a school (as defined by the Ministry of Education per pupil capacity) or a significant increase in school or board operating or capital costs. **Rental/Leases**

Object codes 601 through 630 are rental/leases that would not meet the definition of a leased tangible capital asset per accounting guideline PSG-2. If all the benefits and risks of ownership have been transferred to the Board then the lease would be considered a capital lease and should not be included. The benefits and risks of ownership would be transferred to the board at the inception of the lease, if one or more of the following conditions are present:

(a) There is reasonable assurance that the government will obtain ownership of the leased property by the end of the lease term. Reasonable assurance that the government will obtain ownership of the leased property would be present when the terms of the lease would result in ownership being transferred to the government by the end of the lease term or when the lease provides for a **bargain purchase option**.

(b) The lease term is of such a duration that the government will receive substantially all of the economic benefits expected to be derived from the use of the leased property over its life span. Although the lease term may not be equal to the economic life of the leased property in terms of years, the government would normally be **expected to receive substantially all of the economic benefits related to the leased property** if the lease term is equal to a major portion (**usually 75 percent or more**) of the economic life of the leased property. This is due to the fact that new equipment, reflecting later technology and in prime condition, may be assumed to be more efficient than old equipment which has been subject to obsolescence and wear.

(c) The lessor would be assured of recovering the investment in the leased property and of earning a return on the investment as a result of the lease agreement. This condition would exist **if the present value, at the beginning of the lease term, of the minimum lease payments, excluding any portion thereof relating to executory costs, is equal to substantially all (usually 90 percent or more) of the fair value of the leased property**, at the inception of the lease.
