

MINISTRY OF EDUCATION

UNIFORM CODE OF ACCOUNTS

(Manual for Ontario School Boards)

Revised May 2019
Includes up to release No. 9

Uniform Code of Accounts and Financial Data Requirements For Ontario School Boards

Introduction

This document is provided to outline the Ministry of Education's detailed financial data requirements for Ontario School Boards.

The purpose of this manual is:

- To outline the specific financial data and "mandatory accounts" that are required for reporting to the Ministry of Education;
- To provide definitions for recording of specific types of revenues and expenditures;
- To provide definitions regarding which accounts will be considered classroom and non-classroom; and
- To define administration and governance, pupil accommodation and special education expenditures for enveloping purposes.

Boards are required to report detailed financial data using the mandatory accounts provided in this manual. In many instances, school boards may wish to collect and capture information in more detail than the level required by the Ministry. Therefore it is expected that a Board's actual chart of accounts will vary from the mandatory requirement. Boards are free to expand or change the accounts utilized for its own purposes but must be able to summarize and report the mandatory accounts.

Structure of the Uniform Code of Accounts

The Uniform Code of Accounts is structured such that account segments are grouped together to form unique account codes. The groupings of accounts, as set forth in the Manual, reflect the range of services now offered by the districts and school authorities and the level of detail that the Ministry of Education requires from school boards.

The Mandatory Account Segments are as follows:

Function: 2 digit code which reflects the minimal broad revenue and expenditures categories required for reporting revenues and expenditures to the Ministry of Education

Object: 3 digit code reflects the specific accounts within the above broad revenue and expenditure category required for reporting to the Ministry of Education

Panel: 1 digit code which assigns expenditures to a panel, where applicable.

Location: Board Defined

Program: 3 digit code which allows for accumulating specific program costs

(School boards may wish to expand any/or all of the segments for internal reporting.)

The order of the account segments has no particular importance or significance and a Board may structure its account number in any order that suits its various reporting purposes, as long as the data can be reported in the prescribed format. However, this document will use the following structure for examples:

XX – XXX – X – XXX – XXX

Function Object Panel Location Program

Location information will be Board specific and will not be reported to the Ministry of Education. The mandatory accounts to be reported will therefore be in the following format:

XX – XXX – X – XXX

Function - Object - Panel - Program

This Manual includes two sections.

Section 1: Code & Description Listing with definitions. This section includes a simple listing of the mandatory codes and related descriptions and definitions for each account segment. The definitions and descriptions will explain the types of expenditures that would be coded to each account segment or combinations of segments. Examples will be included as appropriate to clarify the definitions.

Section 2: Listing of Accounts– sorted by Object Code, Function Code. This section includes a complete listing of all valid combinations of account segments and the mapping reference for inclusion in the various expenditure categories, and indicates how accounts are categorized for enveloping.

The Ministry of Education will provide clarifications for this manual from time to time as the need arises.

Relationships: Code of Accounts and the Grants for Student Needs Funding Model

The Code of Accounts defines the smallest building block of data that is necessary to produce financial information for the Ministry of Education.

It is important to note that although there is a similarity between the Code of Accounts and the expense grid used for Ministry reporting purposes, they are not the same. Refer to instructions for the expense schedule in the ministry grant forms.

Example: A bursary provided by the Board of Trustees would be coded as function “Governance/Trustees” as follows:

31 - 705 - 1 - xxx - 000

Governance/Trustees –Student Bursaries/ Awards Elem - General Program

This, however would be mapped to “Texts, Classroom Supplies & Equipment” (Classroom envelope) in the expense schedule in the ministry reporting forms.

For further information or clarification regarding the Code of Accounts, please contact the Finance Officer assigned to your board, or any of the following:

Special Education Expense Reporting
Instructions for DSBs
Revised March 2010

With the announcement of additional funding for special education in December 2002, and concerns about variation in boards' interpretation of allowable expenses for reporting on special education, the ministry determined that there is a need to provide additional guidance to boards on allowable expenses that can be reported as special education expenses. This will establish a common standard of practice that will support consistency and comparability of information across boards.

This section provides guidance to district school boards (DSBs) on the ministry's expectations regarding appropriate expense reporting on boards' use of the Special Education Grant allocation. This refers to special education expenses only, and does not relate to the reporting of expenses on remedial or Learning Opportunity Grant programs. These instructions supplement existing ministry documentation in the Uniform Code of Accounts, Technical Papers, regulations and memos to school boards.

The instructions provide clarification and explicit direction to boards, and do not represent a change to the ministry's policy on reporting requirements. As such, these instructions do not diminish the ministry's commitment to supporting boards' choice in the range and scope of programming and placements they wish to provide for students with special education needs.

In some areas, the instructions describe best practices that boards will be expected to follow if they have systems in place to provide appropriate information. Where an item is not described as a best practice, it is a requirement.

Reporting Special Education Expenses

The allocation for special education under the Grants for Students Needs (GSN) funding model is intended to cover the incremental costs of providing special education programs and services. This means that only the additional costs associated with meeting the needs of special education students are considered to be special education expenses for the purposes of enveloping.

The Special Education Grant was not intended to cover all board expenses related to providing special education programs and services. Specifically, the grant was not intended to cover the additional costs of board administration, transportation and school operational costs. These expenses were taken into account when other grants within the GSN funding model were developed.

Since other grants, such as the Foundation Grant, Transportation Grant, and the Administration and Governance Grant, provide funding for all students, these grants generate revenue that is expected to be used to support the infrastructure and basic direct service costs of serving a boards' student population. This includes costs associated with transportation, secretarial support to administrators and coordinators, and librarians or guidance counsellors.

As is already outlined in the Uniform Code of Accounts, expenses in respect of other program categories, such as English as a Second Language (ESL) and learning opportunities, are not to be included in special education.

Reporting on Integrated and Resource Withdrawal Programs

For integrated and resource-withdrawal programs, only incremental costs associated with serving special education students are to be reported. Expenses related to regular classroom teachers, supplies, classroom computers and other standard classroom expenses are not to be included as they are not incremental to the cost of providing programs and service to a class. For example, expenses for a teacher's assistant who supports three special education students in an integrated class would be an incremental cost and therefore should be reported as a special education expense.

Reporting on Self Contained Classes

Boards are to report the entire cost of some expense categories for self contained classes. As part of the enveloping calculation, the financial reports contain an adjustment for self contained classes, so that a portion of the Foundation Grant for students in these classes is deducted from reported expenses, because it covers the basic costs of these classes. This portion includes the Foundation Grant allocation for teachers, teachers' assistants, and preparation time. This allows the remaining costs to be included as incremental special education expenses.

Costs associated with library/guidance and in-school administration, which includes the cost of principals, vice-principals, and secretaries, will generally NOT be reported as a special education expense because these costs are not incremental to the cost of operating a school. However, in certain exceptional situations, boards may charge certain costs associated with library/guidance and in-school administration where additional resources have been specifically and clearly assigned to schools to meet the needs of a very high concentration of special education students. Boards will be required to demonstrate that any charges for in school administration or library/guidance to the special education envelope is incremental to the standard board allotment of administrative resources to individual schools, and are due to the presence of special education students.

Average Class Size Calculation

Self contained special education classes are to be excluded from the calculation of average class size. Where this occurs, the expenses for the classroom teacher and preparation time are to be reported as special education expenses.

Where a small, special purpose class (for example, vocational high school, remediation program) is not considered to be a special education self contained class, the class may be included in the calculation of average class size, and the expenses are to be reported as part of the board's regular program and are **not** to be reported as special education.

Reporting Staff Costs

Since all boards do not have information systems that provide details on staff assignments, it is necessary to propose a best practice approach. To report staff costs (salaries, benefits, and retirement gratuities), boards will:

- use the most accurate approach, as noted below, given their current systems;
- be consistent on the treatment of an item within a report (for example, Estimates or Financial Statements);
- disclose the approach used in each report to local SEACs;
- use the board average for retirement gratuities throughout all reports.

In Estimates, it is acceptable for boards to use average staff costs for all staff categories, as specific staff assignments are not yet known for the coming school year. In some boards, the use of actual staff costs may be known, where core staff are expected to remain in place. In all cases, the best estimate is to be used.

In Financial Statements, boards should report actual staff costs for teachers and teachers' assistants wherever possible.

For reporting on supply and occasional teachers, the best practice is to use actual days of staff assignments to replace special education teachers, multiplied by average per diem salary and benefit costs. This is preferable to using the average numbers of days that all teachers throughout the board are replaced, as this may be high (due to non-replacement) or low (due to above average absences). Where a board is unable to track actual replacements, any types of teachers that are not replaced (such as special education resource teachers) should be excluded from a calculation of an average replacement rate.

Expense Categories

The following section provides descriptions of the specific types of items boards may report as special education expenses, for the purpose of meeting the enveloping requirement. Items are considered inclusive and exhaustive; if an item does not fit within the characterization given below, it is not to be considered a special education expense.

Classroom Teachers

- Teachers of self-contained classes;
- Special education resource teachers (SERTs);
- Itinerant special education teachers supporting classroom teachers (to do educational assessments, develop special education student programs) and providing direct instruction.

Occasional /Supply Teachers

- Supply and occasional teachers replacing special education teachers in self- contained classes or resource withdrawal settings.

Teacher Assistants

- Special education teachers' assistants in integrated, resource withdrawal, and self contained settings;
- Supply teachers' assistants replacing special education assistants.

Textbooks, Learning Materials, Classroom Supplies and Equipment

- Incremental cost of additional supplies, textbooks, learning materials for integrated and self contained classes, **excluding** costs for materials for special education classes that are purchased as part of the board's normal, regular day school, school-based textbook and supply purchasing arrangement;
- Actual cost of purchasing and maintaining specialized or adapted materials or equipment, including computer software;
- Testing materials for specialized assessments;
- Classroom supplies related to ISA 4 classrooms;
- For field trips: total cost of transportation and bus monitor costs for field trips for self contained classes and incremental costs for transportation and bus monitor costs for field trips for special education students in integrated classes. (This **excludes** costs of transportation for co-op and job placements, and any other trips that are part of the regular school program, such as alternative physical education programming. These are to be reported as part of school to school transportation costs).

Classroom Computers

- Incremental cost of specialized computer hardware for special education students in integrated and self contained classrooms, **excluding** costs for computers for special education classes that are purchased as part of the board's normal, regular day school computer purchasing arrangement.

Professionals, Paraprofessionals and Technicians

- Costs for professionals and para-professionals working with students receiving special education programs and services, and technicians working on specialized special education equipment, prorated on a rational, defensible basis to reflect the proportion of staff time spent in services and supports for students with special education needs; different rates for different types of staff may be used to reflect board experience with the demands on staff resources to support special education students;
- Heads of professional departments, such as psychology and social work, prorated to reflect the proportion of staff time spent in services and supports for students with special education needs;
- Proportion of early identification and assessment costs associated with work conducted by professionals and para-professionals, based on board experience with the proportion of students found to have special education needs;
- **Excludes** secretaries supporting professionals, para-professionals, and technicians, as these are to be included in board administration.

Library & Guidance

- Generally **not** to be reported; however, costs may be reported related to library and guidance staff in schools where it can be demonstrated that additional resources have been allocated to a school due to a very high concentration of students with special education needs; **excludes** any additional resources assigned due to support LOG programs.

Staff Development

- All special education related professional development for all special education staff, including teachers' assistants, supply teachers and professionals;
- Supply teachers backfilling for teachers of self contained special education classes and special education resource teachers (SERTs) on any training or for teachers of regular classes attending special education related professional development.

Preparation Time

- Portion of teachers' salary (including home instruction teachers working with students with special education needs) that does not relate to instructional time, such as preparation time and on-call time not used to cover teacher absences; exclude release time for department heads (as per Code of Accounts) OR cost of providing additional staff to cover for special education teachers or SERTs when they are replaced in a class for preparation time;
- Include a portion of any teachers' time, (for example, 10% of salary and benefit costs, according to number of minutes referenced in collective agreements), where teachers are not replaced in a class as they do not have a class responsibility for this portion of the day.

Principals, Vice-Principals

- Generally **not** to be reported; however, costs may be reported related only to schools where it can be demonstrated that additional resources have been allocated to a school due to a very high concentration of students with special education needs; **excludes** any additional resources assigned due to support LOG programs.

Department Heads

- School based special education department head allowances.

School Office - Secretarial and Supplies

- Generally **not** to be reported; however, costs may be reported related to secretaries in schools where it can be demonstrated that additional resources have been allocated to a school due to a very high concentration of students with special education needs;

- **Excludes** any additional resources assigned due to support LOG programs.

Coordinators & Consultants

- Special education consultants and coordinators;

- Any principal or vice principal without a school that provides special education program supervision (excluding supervision of remedial programs);

- **Excludes** secretaries supporting consultants and coordinators, as these are to be included in board administration.

Notes on Expense Category Codes

Costing for Special Education

The allocation for special education under the GSN funding model is intended to cover the incremental costs of providing special education programs and services.

For the integrated and resource-withdrawal programs, expenses relating to classroom teachers, supplies and other "regular" expenses are not to be coded to special education.

For self-contained special education programs however, the teacher and supply teacher salaries are to be reported on a total basis.

For enveloping purposes, the ministry forms adjust the special education expenses reported by the boards by subtracting regular funding for self-contained special education pupils so that expenses and allocations can be compared (on an incremental cost basis).

In each case, only those expenses related to expense categories 111 to 223 (which are equivalent to the new enveloping codes 50 to 62 under the Instruction category) are to be included as special education expenses.

In addition to the above, expenses in respect of other program categories such as ESL or learning opportunities should not be included under special education.

Appendix: Special Education Enveloping

The following table provides a summary of the expected treatment of expenses for different types of classes. Adjustments to remove the appropriate portions of the Foundation Grant and other Special Purpose Grants (e.g. Teacher Qualifications and Experience Grant, French as a First Language portion of the Language Grant and Early Learning Grant) are made within the Enveloping schedule of the financial forms.

Rental/Leases

Object codes 601 through 630 are rental/leases that would not meet the definition of a leased tangible capital asset per Public Sector Accounting Board (PSAB) accounting guideline PSG-2. If all the benefits and risks of ownership have been transferred to the board then the lease would be considered a capital lease and should not be included. The benefits and risks of ownership would be transferred to the board at the inception of the lease, if one or more of the following conditions are present:

(a) There is reasonable assurance that the government will obtain ownership of the leased property by the end of the lease term. Reasonable assurance that the government will obtain ownership of the leased property would be present when the terms of the lease would result in ownership being transferred to the government by the end of the lease term or when the lease provides for a **bargain purchase option**.

(b) The lease term is of such a duration that the government will receive substantially all of the economic benefits expected to be derived from the use of the leased property over its life span. Although the lease term may not be equal to the economic life of the leased property in terms of years, the government would normally be **expected to receive substantially all of the economic benefits related to the leased property** if the lease term is equal to a major portion (**usually 75 percent or more**) of the economic life of the leased property. This is due to the fact that new equipment, reflecting later technology and in prime condition, may be assumed to be more efficient than old equipment which has been subject to obsolescence and wear.

(c) The lessor would be assured of recovering the investment in the leased property and of earning a return on the investment as a result of the lease agreement. This condition would exist **if the present value, at the beginning of the lease term, of the minimum lease payments, excluding any portion thereof relating to executory costs, is equal to substantially all (usually 90 percent or more) of the fair value of the leased property, at the inception of the lease.**

Special Education program costs represent the incremental spending related to special education. Expenditures relating to classroom teachers, supplies and other "regular" expenditures are not to be coded to this program. On the other hand, for self-contained classes or schools, the expenditures recorded in this program are total expenditures directly related to the self-contained classes or schools. Boards are to ensure that costs are only assigned to one program, i.e. Special Education or Learning Opportunities.
