2022-2023 UNIFORM CODE OF ACCOUNTS

(Manual for Ontario School Boards)

Revised April 2023

Includes up to release No. 13

Uniform Code of Accounts and Financial Data Requirements For Ontario School Boards

Introduction

This document is provided to outline the Ministry of Education's detailed financial data requirements for Ontario School Boards.

The purpose of this manual is:

- To outline the specific financial data and "mandatory accounts" that are required for reporting to the Ministry of Education;
- To provide definitions for recording of specific types of revenues and expenditures;
- To provide definitions regarding which accounts will be considered classroom and non-classroom; and
- To define administration and governance, pupil accommodation and special education expenditures for enveloping purposes.

Boards are required to report detailed financial data using the mandatory accounts provided in this manual. In many instances, school boards may wish to collect and capture information in more detail than the level required by the Ministry. Therefore it is expected that a Board's actual chart of accounts will vary from the mandatory requirement. Boards are free to expand or change the accounts utilized for its own purposes but must be able to summarize and report the mandatory accounts.

Structure of the Uniform Code of Accounts

The Uniform Code of Accounts is structured such that account segments are grouped together to form unique account codes. The groupings of accounts, as set forth in the Manual, reflect the range of services now offered by the districts and school authorities and the level of detail that the Ministry of Education requires from school boards.

The Mandatory Account Segments are as follows:

Function: 2 digit code which reflects the minimal broad revenue and expenditures categories required for reporting revenues and expenditures to the Ministry of Education

Object: 3 digit code reflects the specific accounts within the above broad revenue and expenditure category required for reporting to the Ministry of Education

Panel: 1 digit code which assigns expenditures to a panel, where applicable.

Location: Board Defined

Program: 3 digit code which allows for accumulating specific program costs

(School boards may wish to expand any/or all of the segments for internal reporting.)

The order of the account segments has no particular importance or significance and a Board may structure its account number in any order that suits its various reporting purposes, as long as the data can be reported in the prescribed format. However, this document will use the following structure for examples:

XX – XXX – X – XXX – XXX

Function Object Panel Location Program

Location information will be Board specific and will not be reported to the Ministry of Education. The mandatory accounts to be reported will therefore be in the following format:

XX – XXX – X – XXX

Function - Object - Panel - Program

This Manual includes two sections.

Section 1: Code & Description Listing with definitions. This section includes a simple listing of the mandatory codes and related descriptions and definitions for each account segment. The definitions and descriptions will explain the types of expenditures that would be coded to each account segment or combinations of segments. Examples will be included as appropriate to clarify the definitions.

Section 2: Listing of Accounts– sorted by Object Code, Function Code. This section includes a complete listing of all valid combinations of account segments and the mapping reference for inclusion in the various expenditure categories, and indicates how accounts are categorized for enveloping.

The Ministry of Education will provide clarifications for this manual from time to time as the need arises.

Relationships: Code of Accounts and the Grants for Student Needs Funding Model

The Code of Accounts defines the smallest building block of data that is necessary to produce financial information for the Ministry of Education.

It is important to note that although there is a similarity between the Code of Accounts and the expense grid used for Ministry reporting purposes, they are not the same. Refer to instructions for the expense schedule in the ministry grant forms.

Example: A bursary provided by the Board of Trustees would be coded as function “Governance/Trustees” as follows:

31 - 705 - 1 - xxx - 000

Governance/Trustees –Student Bursaries/ Awards Elem - General Program

This, however would be mapped to “Texts, Classroom Supplies & Equipment” (Classroom envelope) in the expense schedule in the ministry reporting forms.

For further information or clarification regarding the Code of Accounts, please contact the Finance Officer assigned to your board, or reporting.entity@ontario.ca

Special Education Expense Reporting Instructions for DSBs

Revised April 2022

This section provides guidance to district school boards (DSBs) on the ministry's expectations regarding appropriate expense reporting on boards' use of the Special Education Grant allocation. This refers to special education expenses only, and does not relate to the reporting of expenses on remedial or Learning Opportunity Grant programs. These instructions supplement existing ministry documentation in the Uniform Code of Accounts, Technical Papers, regulations and memos to school boards.

The instructions provide clarification and explicit direction to boards, and do not represent a change to the ministry's policy on reporting requirements. As such, these instructions do not diminish the ministry's commitment to supporting boards' choice in the range and scope of programming and placements they wish to provide for students with special education needs.

In some areas, the instructions describe best practices that boards will be expected to follow if they have systems in place to provide appropriate information. Where an item is not described as a best practice, it is a requirement.

Reporting Special Education Expenses

The allocation for special education under the Grants for Students Needs (GSN) funding model is intended to cover the incremental costs of providing special education programs, services and equipment. This means that only the additional costs associated with meeting the needs of special education students are considered to be special education expenses for the purposes of enveloping.

The Special Education Grant establishes the level of funding that each school board may spend on special education; however, school boards may spend more on special education programs, services and/or equipment. School boards must take into account any funding through the PPF that applies to special education programs in the determination of their compliance with the special education enveloping provisions.

The Special Education Grant was not intended to cover all board expenses related to providing special education programs and services. Specifically, the grant was not intended to cover the additional costs of board administration, transportation and school operational costs. These expenses were taken into account when other grants within the Grants for Student Needs funding model were developed.

Since other grants, such as the Foundation Grant, Transportation Grant, and the Administration and Governance Grant, provide funding for all students, these grants generate revenue that is expected to be used to support the infrastructure and basic direct service costs of serving a boards' student population. This includes costs associated with transportation, secretarial support to administrators and coordinators, and librarians or guidance counsellors.

As is already outlined in the Uniform Code of Accounts, expenses in respect of other program categories, such as English as a Second Language (ESL) and learning opportunities, are not to be included in special education.

Only those expenses related to expense categories 111 to 223 (which are equivalent to the enveloping codes 50 to 62 under the Instruction category) are to be included as special education expenses.

Reporting on Integrated and Resource Withdrawal Programs

For integrated and resource-withdrawal programs, only incremental costs associated with serving students with special education needs are to be reported. Expenses related to regular classroom teachers, supplies, classroom computers and other standard classroom expenses are not to be included as they are not incremental to the cost of providing programs and service to a class. For example, expenses for a teacher's assistant who supports three students with special education needs in an integrated class would be an incremental cost and therefore should be reported as a special education expense.

Reporting on Self Contained Classes

Boards are to report the entire cost of some expense categories for self contained classes. As part of the enveloping calculation, the financial reports contain an adjustment for self contained classes, so that a portion of the Pupil Foundation Grant, French as First Language Grant and Teachers' Qualification and Experience Grant for students in these classes is deducted from reported expenses, because it covers the basic costs of these classes. This portion includes the Pupil Foundation Grant allocation for teachers, and preparation time. This allows the remaining costs to be included as incremental special education expenses.

Costs associated with library/guidance and in-school administration, which includes the cost of principals, vice-principals, and secretaries, will generally NOT be reported as a special education expense because these costs are not incremental to the cost of operating a school. However, in certain exceptional situations, boards may charge certain costs associated with library/guidance and in-school administration where additional resources have been specifically and clearly assigned to schools to meet the needs of a very high concentration of students with special education needs. Boards will be required to demonstrate that any charges for in school administration or library/guidance to the special education envelope is incremental to the standard board allotment of administrative resources to individual schools, and are due to the presence of students with special education needs.

Average Class Size Calculation

Self contained special education classes are to be excluded from the calculation of average class size. Where this occurs, the expenses for the classroom teacher and preparation time are to be reported as special education expenses.

Where a small, special purpose class (for example, vocational high school, remediation program) is not considered to be a special education self contained class, the class may be included in the calculation of average class size, and the expenses are to be reported as part of the board's regular program and are **not** to be reported as special education.

Reporting Staff Costs

Since all boards do not have information systems that provide details on staff assignments, it is necessary to propose a best practice approach. To report staff costs (salaries, benefits, and retirement gratuities), boards will:

- use the most accurate approach, as noted below, given their current systems;
- be consistent on the treatment of an item within a report (for example, Estimates or Financial Statements);
- disclose the approach used in each report to local Special Education Advisory Committees (SEACs);
- use the board average for retirement gratuities throughout all reports.

In Estimates, it is acceptable for boards to use average staff costs for all staff categories, as specific staff assignments are not yet known for the coming school year. In some boards, the use of actual staff costs may be known, where core staff are expected to remain in place. In all cases, the best estimate is to be used.

In Financial Statements, boards should report actual staff costs for teachers and teachers' assistants wherever possible.

For reporting on supply and occasional teachers, the best practice is to use actual days of staff assignments to replace special education teachers, multiplied by average per diem salary and benefit costs. This is preferable to using the average numbers of days that all teachers throughout the board are replaced, as this may be high (due to non-replacement) or low (due to above average absences). Where a board is unable to track actual replacements, any types of teachers that are not replaced (such as special education resource teachers) should be excluded from a calculation of an average replacement rate.

Expenses are to be recorded on an adjusted compliance basis only – not on a PSAB basis. This means that expenses would be recorded in a manner consistent to the recording of expenses on Schedule 10 ADJ. Therefore, boards should not include the additional expenses for (and do not have to make the adjusting entries by program for):

- (i) Interest accrual
- (ii) Employee benefits (however, boards must include any changes to the Employee Benefit Expense resulting from plan or benefit changes)
- (iii) School generated funds

For detailed reporting instructions, please refer to the most recent version of the Financial Statements Instructions in EFIS - Schedule 10A&B, Data Form A.2 Enveloping - Special Education Envelope.

Expense Categories

The following section provides descriptions of the specific types of items boards may report as special education expenses, for the purpose of meeting the enveloping requirement. Rental/Leases

Object codes 601 through 630 are rental/leases that would not meet the definition of a leased tangible capital asset per Public Sector Accounting Board (PSAB) accounting guideline PSG-2. If all the benefits and risks of ownership have been transferred to the board then the lease would be considered a capital lease and should not be included. The benefits and risks of ownership would be transferred to the board at the inception of the lease, if one or more of the following conditions are present:

(a) There is reasonable assurance that the government will obtain ownership of the leased property by the end of the lease term. Reasonable assurance that the government will obtain ownership of the leased property would be present when the terms of the lease would result in ownership being transferred to the government by the end of the lease term or when the lease provides for a **bargain purchase option**.

(b) The lease term is of such a duration that the government will receive substantially all of the economic benefits expected to be derived from the use of the leased property over its life span. Although the lease term may not be equal to the economic life of the leased property in terms of years, the government would normally be **expected to receive substantially all of the economic benefits related to the leased property** if the lease term is equal to a major portion (**usually 75 percent or more**) of the economic life of the leased property. This is due to the fact that new equipment, reflecting later technology and in prime condition, may be assumed to be more efficient than old equipment which has been subject to obsolescence and wear.

(c) The lessor would be assured of recovering the investment in the leased property and of earning a return on the investment as a result of the lease agreement. This condition would exist **if the present value, at the beginning of the lease term, of the minimum lease payments, excluding any portion thereof relating to executory costs, is equal to substantially all (usually 90 percent or more) of the fair value of the leased property, at the inception of the lease.**

Legal Fees related to salary negotiations, grievances, property matters and student suspensions.

Note: Legal fees should be charged to functions that map to the Board Administration envelope except when capitalized as part of a capital project.
