

**Authorization Between School Board and School Boards' Co-operative Inc.**

School Boards' Co-operative Inc. (SBCI) has entered into an agreement with the Ontario Ministry of Education (ministry) to provide the ministry with sick leave data analysis, with the authorization of participating school boards. The purpose of this project is to provide the ministry and school boards with a better understanding and visibility into sick leave trends in the sector and help support the next round of collective bargaining.

The aggregate data to be provided to the ministry will be compiled from both existing sick leave data that SBCI has from school boards that participated in the 2014-15 to 2017-18 Absence Studies as well as additional data required for this project.

SBCI is requesting your authorization to release existing sick leave data in our possession and additional data collected to the ministry from any of the above identified data sets. The data and any analysis of the data to be released to the ministry will be by employee groups and, for privacy reasons, will not reveal any data on individuals.

Please complete the information below and return this form to SBCI via email at [EDUdatapoint@sbc.org](mailto:EDUdatapoint@sbc.org) or by fax 905-669-9810.

I hereby authorize SBCI to provide this school board's sick leave data and analysis to the Ministry of Education.
