

SCHEDULE 10: Consolidated Statement of Operations: Revenue

General Instructions

Schedule 10 is divided into four sections. The first section reports total revenues of the municipality.

The fourth section captures the provincial and federal gas tax (now called Canada Community Building fund) reported in Schedule 12.

CONTINUITY OF GOVERNMENT BUSINESS ENTERPRISE EQUITY

According to the CPA Canada, Public Sector Accounting Handbook, PS 1300.28, a government business enterprise has the following characteristics:

- (a) It is a separate entity with the power to contract in its own name and that can sue and be sued.
- (b) It has been delegated the financial and operational authority to carry on a business.
- (c) It sells goods and services to individuals and organizations outside of the government reporting entity as its principal activity; and
- (d) It can, in the normal course of its operations, maintain its operations and meet its liabilities from revenues received from sources outside of the government reporting entity.

Municipalities report business government entities on a modified equity basis. This avoids line by line consolidation of the enterprise's operations with the municipality and its local boards. At the same time, reporting on a modified equity basis provides summary information on net assets and net income.
